Energy and Emission Policy

Premier Road Carriers Limited ("PRCL") recognises the global action of sustainable energy use and resource conservation to minimise greenhouse gas emissions as an essential criterion for its operations. Aside from the Environmental Policy,

PRCL will make every effort to:

- Maintain legal compliance with applicable energy and emission-related rules and regulations through a progressive management strategy.
- Identify and assess the risks connected with energy and emission-related activities, then develop mitigation methods.
- Set goals, targets, and processes to reduce energy and carbon footprints by performing energy conservation actions on a continual basis and deploying energy-efficient technologies.
- Encourage the use of renewable, green, and clean energy sources.
- Encourage green procurement and innovation in order to implement low-carbon, sustainable, and energy-efficient technology.
- Educate stakeholders to promote energy resource efficiency; and
- Measure, monitor, and review the organization's energy and emission performance in compliance with this policy on a regular basis, and audit (internal/external) it before communicating with key stakeholders.

The policy will be evaluated annually for relevance and changed as needed.
