## Sustainable-Procurement-Policy

#### Scope

The Sustainable Procurement Policy aims to integrate environmental, social, and economic sustainability considerations into all procurement activities of the organization, from sourcing to disposal.

#### **Applicability**

This policy applies to all departments and divisions within the organization, covering procurement activities both locally and internationally, across all categories of goods and services, with a focus on promoting sustainable practices throughout the supply chain.

#### **Policy**

Premier Road Carriers Limited (PRCL) is committed to achieving its goals of legal and moral business conduct by integrating various ESG factors into its supply chain decision-making, such as the respect for human rights, business ethics, and the environmental friendliness of products and services. The business aims to take the following factors into account when making purchase decisions:

Suppliers conduct their business in line with the supplier code of conduct established by PRCL, environmental policies and standards, federal, state, and local laws, rules intended to prevent dangers to health and safety, and a desire to go above and beyond the requirements.

Suppliers work to continuously improve environmental performance by setting goals, targets, and procedures for the efficient use of water, energy, and natural resources as well as for the avoidance of the use of dangerous or poisonous substances, waste minimization, emission control, and pollution prevention.

Before informing key stakeholders, suppliers regularly assess, monitor, and review the organization's environmental performance and get it audited (internally/externally).

Annual reports from suppliers should include key environmental performance indicators. Suppliers promise environmentally responsible.

Suppliers conduct business in accordance with the highest moral and ethical standards, respecting the human rights of all parties involved, especially their employees.

Suppliers collaborate and form partnerships with their stakeholders, particularly the local community, in order to expand responsibly.

When possible, PRCL made an effort to buy goods and services from area vendors, especially local companies.

acquiring products that have been recycled or partially recycled while increasing producer responsibility.

Supplier businesses adhered to international standards.

PRCL considers supplier growth to be crucial to the success of the business. The business is committed to working with suppliers to implement PRCL's Sustainable Procurement Policy, which emphasises reducing the use of toxic materials, conserving natural resources, minimising waste generation and release of pollutants/emissions, maximising reusability and recyclability across value chains, prohibiting the use of child labour, complying with applicable wage and hour laws, and ensuring a safe and healthy working environment for employees/worked. In addition, PRCL supports the development and implementation of a sustainable procurement policy by its suppliers.

Ver 1.0 dt. 12.09.2023

PRCL demands that its suppliers put internal policies, governance structures, systems, and processes in place in order to ensure compliance with this policy and to demonstrate continual improvement in their ESG performance.

To the greatest extent possible, all end-users and departments in charge of acquiring goods and services for PRCL must adhere to this policy and make a concerted effort to buy eco-friendly goods and services by taking into account their life-cycle costs and potential adverse effects on people and the environment.

This policy should be reviewed in conjunction with the PRCL Supplier Code of Conduct. <a href="https://www.prclimited.co.in/policies.html">https://www.prclimited.co.in/policies.html</a>
